

COCOON™ 4 CAMERA HOME SECURITY SYSTEM WITH DVR

Network & Smartphone Setup Guide

HE180106
12/2018

Follow these steps to connect your DVR to a broadband internet connection so you can view your cameras remotely on your smartphone and Windows PC

A tutorial video of these steps can be found on the Winplus website www.winplus.com.au

1. Connect your DVR to the Internet

- Connect all cameras to your DVR as per instructions in user manual
- Connect your DVR to your TV or monitor (Not laptop) using an HDMI or VGA cable
- Connect your DVR to your modem router using the ethernet cable
- Turn on your DVR

2. Test your Internet Connection

- From your DVR, right click on the screen to access the Main Menu.

NOTE: The default Login is 'admin' and the default password is left blank. You can change the default settings under Main Menu → Set Up → Users

- In the Main Menu, go to Set Up and select Network
- Ensure that 'Obtain an IP Address Automatically' is ticked.
- Click on the 'Test' button on the bottom of the screen to check if your DVR is connected to the internet.
- A message 'Please Wait' and 'OK' will appear on the screen indicating successful connection.

3. Download and Install the Cocoon HD DVR Application

- Download the Cocoon HD app from the Apple or Google Play Store and install on your smartphone
- Create an account by selecting the 'Register' button and completing the required fields to create an account.

NOTE: The User ID and Password for the Cocoon HD app is different to the Login and Password for your DVR

- Once you are registered, log into the Cocoon HD app
