4 CAMERA HOME SECURITY SYSTEM WITH DVR

## Getting Started Guide

HE150242
12/2017
Version 1.0

1. Connect each of the camera extension cables to the video and power connectors.

2. Connect the other end of the extension cables to the video cable splitter. Connect the splitter to the port marked "VIDEO IN/OUT" on the side of the DVR.

3. Connect the 4-way power splitter to each of the extension cable power plugs.

4. Connect the included HDMI cable to the back of the DVR and connect the other end of the HDMI cable to your monitor or TV.

NOTE: You must switch your TV or monitor to the correct INPUT once the DVR has been powered on. For example, HDMI1

5. **Connect the mouse to the rear USB port.**

6. **Connect the power adaptor to the 4-way splitter and plug into an outlet. Switch the outlet on.**

7. **Connect the remaining power adaptor to the DVR and plug into a mains outlet. Switch the outlet on. The DVR will begin the boot sequence.**

NOTE: Both the DVR and cameras operate "always on". To turn the cameras or DVR off, switch off the power adaptors at the power outlet

Tips: *Test all connections are working before permanently installing DVR and cameras. Position the DVR in a central location where all 4 cameras will reach. If using the optional networking features make sure the modem is near the DVR*
