

POWERCUBE

Getting Started Guide

PowerCube Mounting System

Thank you for purchasing the Cocoon PowerCube. The PowerCube is delivered with a docking mount, allowing you to mount the PowerCube anywhere you want: even on a wall or a table. This allows you to mount a power outlet wherever it is the most convenient for you (*example a*)

The PowerCube can easily be fixed onto the dock: just rotate the PowerCube 90° and it locks into place. Any side of the PowerCube can be used for docking, so the PowerCube can be oriented in any direction (*example b*)

Another great feature of the docking mount is the fact that you can remove it again, without having to worry about leaving any glue residues, or scratching your desk's surface: just pull the tabs and the dock easily comes off

POWERCUBE
